

ISPAC Foxpay 3.0/Windows Canadian Payroll Software

- **Reverse Payroll Calculator.** Will determine the necessary gross pay required to result in a specific net pay amount. Helpful for small business owners and calculating after tax bonuses.
- Extremely FAST processing of timesheets. FoxPay can optionally be set up to assume the normal hours for each employee. If the employee works as usual, only one key stroke is needed to process the pay for that employee.
- Support for standard deductions such as CPP, EI, RSP, Union and employee requested Extra Tax deductions
- Users may define up to 5 pre-tax items (such as taxable benefits) per company. Pre-tax items may be fixed dollar amounts or percentage amounts.
- Users may also define up to 5 post tax items (such as after tax deductions). These may also be based on fixed dollar amounts or percentage amounts.
- Extensive reporting such as Period or YTD earnings, hours (detailed as regular, overtime, sick paid, statutory holidays, paid vacation, etc.)
- Extensive expense reporting.
- Automatic Cheque printing
- T4 printing
- General Ledger summary report sheet
- Direct Deposit support
- Integration into popular accounting packages

The screenshot displays the ISPAC Foxpay 3.0 software interface. On the left, a list of employees is shown, with 'Alen, Dave' selected. The main window shows 'Employee Info' for Dave Alen, including employer 'PPA - Employees' and CCRA Account # '9994543299RP1'. A 'Reverse Calculator' dialog box is open, showing 'Net Pay Desired' of 3500.00 and 'Calculated Net Pay' of 3500.00. Below, the 'Foxpay Payroll Detail' window shows a table of payroll data for Dave Alen and Fred Conner.
