Import/Export Invoice Middleware Software for MPAQ Batch Automation Systems

Software Overview:

- Windows based software
- Imports Ticket Information from the MPAQ Batch Software
- Ticket Information may be modified. Non-MPAQ generated tickets may be entered.

- Customer Discounts may be applied
- Invoices Generated – by Job Id or PO Number
- Invoice Sales information is exported to an accounting package – most popular accounting packages supported.
- Optionally, may be customized to suit unique individual company needs

Reports

All Reports may be preview on-screen or printed.

- **Exception Report** – any events such as new customers/products that occurred when importing from MPAQ
- **Ticket Listing Report** – list of all current tickets in the system which have not been invoiced.
- **Missing Ticket Report** – displays any missing ticket numbers
- **Pre-Invoicing Report** – displays how the invoices will be constructed based on the current tickets in the system.
- **Invoices** – actual invoices to be sent to your customers. May be saved as PDF's.

- **Lien Report**
- **Price List**
